<b>Children</b>	<b>Together for experiences</b>	The Together for Experiences project is intended for children from foster families, they often feel separated from society. They feel that their peers do not understand them well enough in what they are experiencing. The foster families' holiday activities offer these children joint meetings where they can spend their free time and talk openly about what they are experiencing and understand that they are in it together. Experiential programs at these events help children establish friendly relationships.	20 000	Slezská diakonie

	<b>Quiet and relaxing corner for little schoolchildren</b>	Rest and relaxation zones are now a matter of course not only in companies but also in schools. Our children also need a pleasant and safe place to relax and unwind. By building spaces for this purpose, children gain a place where they can relax and then can continue their education with joy and energy. The youngest children and children with specific behavioral and learning disabilities, which are integrated in our school, often need to alternate activities and continuously relax. We have places that directly encourage you to transform into rest and relaxation corners. Investing in our children is the best thing.	20 000	Základní škola F. 	<b>Let's move, Poruba</b>	The project focuses on the support of physical literacy in children of various ages through relay and heptathlon on the school athletics playground at the Ukrajinská primary school in Ostrava-Poruba. Older children will run the classic relay about 200m each in a 3-member team and younger children only a 100m section with the support of their parents. In heptathlon, children compete, for example, in a sand jump, archery, throwing a corn bag at a target, skipping rope and much more. The main goal is to focus on versatility and overall coordination of movement and finally to pull children away from sitting at the PC and actively involve them in sports.	5 000	Zuzana Ľuptovcová

<p><b>Garden house</b></p>	<p>We are a 3-class kindergarten, with 65 children aged 2 - 6 years. We would like to build a wooden garden house for preschool children with a size of 8 m2. The house would be used for children's family and household games. It would help deepen relationships between children. Through joint games, children learn cooperation, communication with each other, ethical and moral qualities for their future life in society. <p><b>Strengthening the areas of the equestrian club</b></p>	<p>The biggest disadvantage is the unpaved surface between the stable and the paddock. The surface where we lead the horses to the paddock is unpaved and very muddy during rains. Strengthening this section would make it possible to reduce the formation of mud and thus safer access to the enclosures. We move around this area with children who attend our JK and pony kindergarten.</p>	<p>20 000</p>	<p>JEZDECKÝ KLUB VANILLA, z.s.</p>
